

Aquarius

liquid laminates

Aqueous based liquid laminates provide the same protection as the more conventional film laminates at a saving of up to 60% in manufacturing costs.

Aquarius liquid laminates are sourced from leading manufacturers in Europe and the USA and have been specially formulated for a variety of inks and applications including truck side curtains, banners, fineart prints and vehicle graphics.

UV protection, chemical resistance, abrasion resistance and flexibility are just some of the benefits of protecting your work with Aquarius liquid laminates.

Fleetkote is our premium high performance gloss liquid laminate. This single component, fleet grade coating is suitable where resistance to abrasion, chemicals and moisture is required. Its flexibility, resistance to UV radiation and non yellowing formula make it ideal for a range of applications including vehicle graphics, truck-side curtains, outdoor signage and billboards all of which are subject to harsh environmental and physical conditions. Fleetkote exhibits great adhesion to solvent, eco, UV and latex inks.

Signkote is a quick drying, economical coating suitable for the protection and enhancement of digitally printed graphics including banners, exhibition graphics and window graphics. Signkote is available in gloss or matt and can be used on most substrates, including solvent printable canvas, vinyl, banners, fibreglass, wood, metal, plastic, and paper and is suitable for solvent and eco solvent inks.

Artkote is the ideal protective clear coat for Giclee applications. It is formulated to work on micro porous surfaces, reducing or eliminating the pinholes which can be encountered when applying liquid laminates to inkjet receptive canvas. A key feature is that it exhibits excellent flexibility which is required for stretching canvas. This water based coating protects prints from moisture, light, humidity, atmospheric contaminants, abrasions and even fingerprints.

Muralkote is a water based protective clearcoat with a satin or matt finish that protects and enhances digitally printed wallpaper graphics. Muralkote dries quickly providing good scratch and abrasion resistance.

All Aquarius liquids can be applied manually or with automated equipment such as our A1600, A2200 and A3200 coaters. Our liquids are also compatible with equipment supplied by Cleastar®, Drytac® and Seal®.

Aquarius liquid laminates are available in 1, 5, 10, 25 and 210 litre containers on a next day delivery throughout the UK. Tell us what you need and we will make sure we always keep it in stock.

50ml samples of all water based liquids are available free of charge from our website www.ftcuk.com

PROPERTIES

- Use instead of film laminates
- Water based
- Low odour
- Advanced UV inhibitors
- Enhances colour
- Highly flexible
- Chemical resistant
- Water resistant
- Will not yellow
- Easy clean up with soap and water
- Packaging 1 litre, 5 litre, 10 litre, 25 litre and 210 litre

APPLICATIONS

- Banners
- Wall coverings
- Billboards
- Vehicle graphics
- Fine art
- Truck side curtains
- Giclee prints
