Made in the UK

Trimalco are pleased to introduce the **Artemis** safety straight edge, a simple and effective solution to assist in the safe cutting of many of the materials used in the modern Sign and Graphics industries.

This top quality straight edge has been engineered in extruded aluminium and anodised for lasting protection. The **Artemis** has been shaped to help focus downward pressure on clamping the work piece and to protect fingers against any tool slippages. The underside features two full length silicone inserts to assist gripping and to provide essential protection for sensitive surfaces. A full length dual metric/imperial scale is fitted along the front edge and a press-fit stainless steel bead helps to protect the aluminium edge from blade damage.

The Artemis is an essential aid for cutting, scoring and pen lining, the Artemis is available in 6 lengths from 60cm (24") to 300cm (120").
