Made in the UK

The Kronos is Trimalco's general purpose cutter.

The strong and stable, anodised aluminium base incorporates a narrow groove that safely accepts the blade tip during cutting and provides the perfect foundation for your work. A cutting mat can be added when required for cutting thin materials and textiles.

The Kronos features a self adjusting hinge and lift arm assembly which allows the cutter to accommodate materials longer than itself and provides lay-flat cutting on materials up to 13mm thick.

The cutting head, which is common to all Trimalco cutter rails, includes a magnetic blade magazine which accepts standard utility blades and standard scoring blades.

A 45mm textile cutting wheel and holder is also included as standard.

Three full length silicone grip strips, 2 on the cutter and one on the base aid clamping and provide protection for the most delicate of substrates.

The Kronos can be used as a table top cutter or alternatively it can be mounted on an optional stand. The optional stand brings the cutter to a comfortable 86cm – 34" working height and includes adjustable supports to prevent any bowing along the length of the cutter.

The Kronos is available in six sizes from 60cms to 300cms.
